

The Foundation has raised more than \$30 million to support a wide range of Virginia Hospital Center initiatives including a major expansion of Radiation Oncology, a significant upgrade of the Cardiac Catheterization Labs, acquisition of advanced medical technology throughout the Hospital, professional education for nurses and other healthcare professionals, and care for low-income and uninsured children through the Arlington Pediatric Center.

At Virginia Hospital Center, we believe that communities thrive when excellent healthcare is extended to all. The Hospital is a not-for-profit and depends on the generous support of donors to ensure that world class medical care is accessible to all of our patients.

OUR MISSION is to support the healthcare needs of our community by advancing medical excellence at Virginia Hospital Center through philanthropy

IMPACT OF GIVING

OVER \$8 MILLION RAISED IN 2017

GIVING BACK

Below are just a couple of the ways donor support made an impact in 2017

- APC provided comprehensive medical care to 3,607 children in need in Arlington County
- Nearly \$30,000 were raised through the Christopher Carter Memorial Fund to support diabetes prevention, treatment, & education in our community
